

Raisul Islam Tonmoy

MERN STACK DEVELOPER

Email: raisultonmoy.dev@gmail.com | [Portfolio](#) | [Linkedin](#) | [Github](#) | Phone: +8801930050425
Shantiniketon, Dhaka, Bangladesh

CAREER OBJECTIVE

Seeking a Web Developer role with a strong foundation in MERN Stack technologies, specializing in Node.js/Express.js for building RESTful APIs and managing MongoDB databases. My goal is to join an experienced team where I can contribute to complex server-side logic, optimize application performance, and expand my skills in building secure and efficient enterprise-level solutions.

TECHNICAL & SOFT SKILLS

Frontend: JavaScript (ES6+), React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap,

Backend: Node.js, Express.js, REST API, JWT (JSON Web Token).

Database: MongoDB, MongoDB Atlas.

Tools: Git, GitHub, VS Code, Postman, Firebase, Netlify, Vercel.

Soft Skills: Time Management, Problem Solving, Teamwork, Fast Learner

EXPERIENCE | TechnoArt Software | Internship

Dhaka, Bangladesh

Arambag, Mirpur2,

August 2024 - Feb 2025

Jr Software Development & Operation

- Assisted the Software Management Systems team with documentation, designs, and testing

Projects

eTuitionBd | December 2025 - December 2025

[Live](#) | [Client](#) | [Server](#)

eTuitionBd is a comprehensive tutoring marketplace platform designed to connect students seeking quality education with qualified tutors looking for teaching opportunities, facilitating seamless job matching and payment processing.

- Role-based authentication:** Built role-based authentication with Firebase and optimized state management using React Query.
- Dashboard:** manage applications effortlessly across student, tutor, and admin dashboards.
- Filtering:** Users can filter tuition posts by subject, class level, and location, and sort their results by salary (from high to low or low to high) or date on the client side, with real-time updates.

Tech Used: React, React Router, Firebase Authentication, Tailwind CSS, DaisyUI, React Query, React Leaflet, Swiper JS, Lottie React, SweetAlert2, Axios.

Plateshear | October 2025 - October 2025

[Live](#) | [Client](#) | [Server](#)

Plate Share is a modern web application designed to connect food donors with those in need, reducing food waste and helping communities share resources. Faced challenges with Vercel Deployment, resolved this through online research, and learned Redux and debugging during the process.

- User-Friendly Interface:** Designed with a sleek interface, allowing users to easily browse any toy, view details, and try out features effortlessly.
- Filtering:** Users can filter reports by category and sort their transaction list by category name on the server side.
- UI/UX:** Features a smooth Light/Dark mode toggle and engaging page transitions and card list animations powered by Framer Motion.

Tech Used: React, React Router, Firebase, Tailwind CSS, DaisyUI, Axios, Swiper JS.

Item_Sell | November 2025 - November 2025

[Live](#) | [Client](#) | [Server](#)

This is my small ItemSell web app built with Next.js. A platform designed to simplify online selling for individuals and small businesses. Faced challenges with Next.js because it's my fastest project made with this tool, so I resolved this through online research.

- Modern UI:** Responsive interface with animations using React, Tailwind, DaisyUI, Framer Motion, React-Toastify & SweetAlert2.
- Key Features:** Created Item_Sell, a feature-rich CRUD application where users can create, view, update, and delete items, each handled on dedicated routing pages for improved usability.
- Routing Heandel:** Built with React and React Router, enabling smooth client-side navigation between item listing, item creation, item editing, and item management pages.

Tech Stack: Next.js, Firebase, Tailwind CSS, Axios, Express.js, Node.js, MongoDB.
